

## TESTIMONIALS

### Chest & Rib Shirt

*June 28, 2009 (ChestRib)*

Thanks for the product! While catching, our pitcher was throwing 62 MPH fastballs, Hunter took a fastball tipped straight back to his upper chest just above the catchers chest protection hitting the evoshield solidly. It sounded like a plastic bat hitting a concrete wall! He didn't move for a moment and shook his head and stood up. The umpire called time and was checking on Hunter. He called the other team's coach which happens to be my personal doctor to check Hunter out. Along with our coaches, which I am one, we went to the plate to check on him also. Hunter kept saying he was fine and got an OK from the doctor/coach. After the inning was over, the umpire asked me what kind of protection undershirt he was wearing. I explained he was wearing EvoShield and fully described it to him and he was very impressed.

Hunter was the next batter and got drilled in the lower rib and kidney area by a 65 MPH fastball. He flinched, looked at the pitcher, smiled and hit a Slammin triple down the third base line chalk line. Being well known throughout the little league organization, coaches wanted info on the EvoShield, so hopefully you got some orders of this. Please send me a complete listing of your products as I don't have a PC.

Thanks , John E.

*June 19, 2009*

My son Jordan (9 ys old) plays Midland Park Travel Baseball, and club baseball on the NJ Blackhawks. He is a pitcher and first baseman. He has been hit by numerous pitches at the plate, and did not feel anything as Evoshield protected him every time. He has complete confidence at bat, and is not skiddish about facing fast pitching, as a result, he is batting .624 in his club league.

Thank you for your product. George W.

*June 19, 2009* I have purchased an evoshield chest protector for my 9 year old son who plays with the NJ Blackhawks 9u club team. We have been extremely happy with the evoshield protector system. The protector gives my son an added feeling of confidence that if he is going to be hit by another player, or a baseball, he does not get injured. I believe he is a more confident with the Evoshield.

Thank you, George W

***June 9, 2009***

I have to tell you this. As a dad and a coach of the team, Evoshield was a difference maker for our team. We were the best hitting team in the league and it was because our boys had the confidence at the plate. At this age, or any age, knowing that if you get hit by a pitcher, it's not going to hurt is a big advantage. It was so funny, during the season when one of our kids would get hit, the coaches would all yell "Evoshield Baby!" Then the team got into it and all 11 players and the coaches would yell it. Then the parents joined in and every time a kids would get hit, 3 coaches, 11 players and 22 parents would yell, "EVOSHIELD BABY!"

Thanks for the support. We will keep you posted on the All Star team. We have our first all star tournament this weekend! Scott

***May 26, 2009***

Evoshield seems to be taking hold here in NC. Noticed some of the guys from UNC were sporting some Evoshield during the ACC Tournament. Awesome. Yesterday, I found out that my son made the 10 year old Allstar team. He has been playing well and I attribute a lot of his hitting to the confidence he has at the plate due to Evoshield. Infact, our rec team is still in the hunt for the title, playing in the semi finals on Wednesday. All the kids are wearing Evoshield and we are definately the best hitting team in the league.

Thanks! Scott R.

***May 5, 2009***

I purchased an Evoshield chest/rib protection shirt for my son last year. We really think this is a great product. I have made many kids and parents aware of it, and have referred them to your website. As I wrote to you before, I still think this is a cool shirt that fulfills the concerns of protection, comfort, and cool style. I recently purchased another this year for him in a bigger size.

Thank you, Bobbi R.

***April 24, 2009***

I just want to say Thank-you for making/developing the chest/back guard. My son has worn this for over a year during Baseball, Football and Basketball seasons. He tells me he does not even realize he is wearing it any longer. He doesn't walk on a field or a court without it! Just last week a took a fastball to the left side of his back. Everyone sitting around me stated that was going to hurt and leave a mark. When the first game was over, he stated that he had no pain and could barely feel it when it hit him. His mother and I took a close look and found no mark on his back. Just so you know my son is not a typical 15 year old boy. He is 6'1" inch and weighs about 165 pounds. Everyone on the team knows he wears it and he has never been teased or laughed at, for wearing it.'

Thanks again for making me feel better when he is playing sports.

Scott Fyiling

***April 16, 2009***

Just wanted to drop you a note and thank you for hooking Tyler up with the Evoshield. It has done wonders for his confidence. Tyler is still a work in progress, but slowly but surely he is becoming more and more courageous. I popped him in the lower back yesterday and guess what? It didn't hurt! I've already been spreading the word about the product and the first class service you guys offer. That really means a lot to people. Anyway, let me know if I can help in any other way.

Thanks again for taking care of Tyler. He's convinced that shield is the equivalent of a big S on his chest. Ever since we got it his balls off the tee and soft toss are all going about 10-15 feet farther on average. Now I know it's all in his head, but so what. The results are all that matters so you better believe I'm playing right along with it. Evoshield makes you stronger? Ok, sounds good to me.

Rob

***April 15, 2009***

Re, Manny hit on his elbow video clip;

THAT IS SO COOL!!!! And it was so loud. I can't wait to show him that. He didn't miss a trick. VERY nice endorsement. My son is a great advertisement for you... and always shows it off... and NEVER... NEVER... plays without it... and he plays on 3 baseball teams.... and is still 11.

Regards

Scott

***April 13, 2009***

As a parent there is nothing harder than watching your child suffer through a preventable sports injury. As a goalkeeper our son has received multiple injuries. Most recently broken ribs at soccer practice. So we purchased a chest and rib protector for our son. What a difference, not only does it provide excellent protection, his confidence has risen tremendously. What a great product. Our son will be wearing his chest protector for the rest of his sports career.

Paul and Sharon K.,  
Sterling Heights, MI

***Jan 17, 2009***

We ordered a Evoshield chest/rib protector because my son had fractured a rib last weekend during a hockey game. I wanted some extra protection for him after this injury and found your web site on the internet and thought I'd give your product a try. We received the EvoShield on Thursday, and my son wore it for the first time during his hockey game last night. During the first period he laid down in front of a shot and took the puck directly to his sternum. He said that he could barely feel the impact from the puck. He told me (with a smile on his face) that he knew that had he not been wearing the new padding and was only relying on his hockey pads that it "would have really hurt". He also said that he didn't have any difficulty from the hits he took during the game with respect to his rib injury. He played a full game and played with confidence because he was wearing the EvoShield padding. He is sold on the new padding and plans on wearing them for all of his hockey games and next football season as well.

Thanks, Frank Nellans

**Dec 5, 2008 (ChestRib & A150 Wrist)**

Hi, My name is Jacob Mellott from Martinsburg Pa. I am 11 years old and love to play Little League baseball, I have been wearing the EvoShield baseball shirt for one season, One time I was hit in the back while sliding into 3rd base and the coach came running to see if I was alright and I asked why, and he said you just got wacked in the back with the ball being fired from 2nd, I never even felt it. My dad said since I was a pitcher it might help me from getting smacked in the chest from a line drive hit ball while on the mound. I really like the shirt it fits very well and doesn't get all bunched up, I really cant tell I'm wearing it, and my friends thinks its pretty cool too.

My dad just got me the wrist guard, He unwrapped the foil covered armour and inserted it into the really cool elastic wrist band, He got me the team color. I could feel it as it hardened around my wrist. I wore it to a function that night that a few of my friends were there ,they didn't believe me that it was armour so they dared me to bang my wrist off the table really hard so I did and showed them I didn't feel a thing, so they tried it too and they thought it was really cool. I cant wait to play baseball this spring!!!!

**Thank You EVO SHIELD - YOU GOT SOME REALLY COOL STUFF**

Yours truly, Jacob Mellott, Age 11 Martinsburg Pa.

**Dec 5, 2008**

GREAT PRODUCT!

My son Zack plays Lacrosse at Chantilly High School in Virginia (2008 VA State Champions!). As I am sure you know, Lacrosse players DO NOT like to wear ANY pads if they can get away with it. Added weight, comfort, agility, and body fit, as well as the "I am a tough lacrosse player, I don't need any pads" are all factors for the players. That obviously is a concern for all of us parents. **The answer...EvoShield!** Zack says that he barely realizes he is wearing his A100 chest & rib protection EvoShirt, and makes a point of showing it to the other players on his team. Several parents have asked me about it as well as some of the coaches. I also appreciate the fact that I could order just an extra shirt, (which we received within two days!) and that Adam took the time to write a personal note on the packing slip to wish Zack a great LAX season and to thank us for our business. You guys are doing an OUTSTANDING JOB! Congratulations, Charlie

**Dec 4, 2008**

Dear Evosheild, I love your product. I bought it for my son and he has greater confidence in the batters box. He is doing so much better because he is not afraid to stay in the box. I would like to know if their is any opportunities in selling your product on a local level. When I explain the product to parents they all want it. Please let me know if any opportunities exist with your company. Thank you. **Mike G.**

**Sept 11, 2008**

Hello! I am the mother of a 15 yr old ice hockey goalie who is now the target for 75 MPH shots. He wouldn't hear of getting a bigger and bulkier chest protector so we bought your chest protector, He loves it and I feel a lot more secure when he is in the net. He is on the Ice 5 times a week so I was wondering if I could purchase an extra shirt....

Thanks Dianne M.

**Sept 5, 2008**

Stan, I got my package today, just in time for my son Tyler's (and his friend's) baseball game tonight! Thank you so very much. Love the product – the quality is phenomenal. It was so easy to put together. I watched the video before I opened it because I was a little nervous about doing it wrong. But, all the pieces matched up with the shirt and I made sure the white side was against my son's body and the black side faced outward. Tyler loves the way it feels, and he, too, was impressed after watching the video and seeing the baseball player throw the ball with such ease wearing the EvoShield. Please send me some marketing flyers, if you have any. I plan on going to the next Monroe Township Little League (MTLL) meeting and presenting the product. I want to get a flyer in the hands of all the coaches, along with your email address and phone number, so they, in turn, can share the product with all of their players. Also, I want to get MTLL to put it on their website that every parent checks regularly. Plus, my son goes to various baseball camps in the summer so I will promote the EvoShield there also. I will tell everyone I contact.

Stan, I am so grateful and I appreciate everything you have done to make my son play a safer game of baseball. *Sincerely, Connie*

**July 2, 2008**

On June 30th, my ten-year-old grandson was pitching in the New Jersey District 10 Cal Ripkin championship game in Hamilton, NJ. Gavin was hit in the chest with a hard line drive; coaches and umpires rushed to his assistance immediately. Gavin never went down, gave a thumbs up, and pointed to his chest. Because he was wearing your Evolve protective vest, no injury was sustained. This could have been a life-threatening injury. When the parents of the other players saw what happened, they all wanted to know where to get a vest like the one Gavin wore. If you would like a picture of Gavin with his chest protector, please contact us. As a HS coach of FB BB Wrestling & track of 32 yrs and also associated with Little League programs I would highly recommend that (at the very least) every every pitcher wear your Evoshield Chest & Rib protector. Thank goodness that Gavin had his vest on June 30th when he was hit.

Thank you so much for your fine product and your caring about our young athletes.  
Sincerely, Herb Hollowell

**June 6, 2008**

We recently purchased the evoshield for our 12 year old daughter and her friend and teammate. She is a pitcher and plays very competitive softball. With the way bats are made these days and her only 40 feet from the batter we thought we'd give the evoshield a try. When I first received it I was worried I would mess up the hardening process some how. I was surprised with how easy it was. Once it hardened I was afraid she would complain it was too heavy or hot. She has wore it for three tournaments now and she has not once complained - even in the hot weather! She hasn't taken a hard hit to it yet (except for friends knocking on it to see how hard it is) but as parents, it is comforting to know she has that protection if she does take a hard shot. Also, my husband ordered it smaller than it should have been and when we contacted you to change it, it was changed with no problem at all. We even received a phone call about the color change. What great service. I'm surprised the sporting goods stores in Cincinnati aren't selling this product yet. Is that something that you all are working on? If so, please give them our e-mail to request that they sell it to the athletes of Cincinnati. I've forwarded your website to friends from Columbus so they can get one for their daughter (another pitcher). Thanks for providing this product to us. Sincerely, Sheri and Doug

**April 27, 2008**

Thanks again, This shirt has really helped my son in his athletic participation and given his mother and I confidence in keeping him safer than he would be without it! Scott C, Anton TX.

**April 21, 2008**

I received my evo-shield last Friday via UPS, it is a very nice product and thank for getting it to me quickly. My daughter was able to wear it for a tourney the next morning. Hopefully I can get my entire team to order from you it is superior to other products of protection on the market. Sincerely,Jon R

**April 2008**

I ordered a shirt for my 6 year old daughter, Emily who has a pacemaker and is playing baseball and will need protection. I found out about your product through a pacemaker chat room. We just received our shirt and shield yesterday but I just wanted to send a big thank you for your service. Everyone I spoke with was extremely helpful, nice and accomodating for what I was needing. I will definetly be recommending you to anyone who needs your product. I thank you again for such GREAT service and will be in contact for additional shirts when needed! Thanks and have a great day. Jodie F

**April 16,2008**

Late spring we purchased the Allsports Armor Chest protection. Loved it. Worked well, player was comfortable and I had some peace of mind knowing he had some protection on the "other"side of the hitter. This year his shirt fits fine, but he had broadened in the chest and the pads don't fit as well. I need to purchase the PADS only. Thanks, Cynthia G

**April 2008**

Dear Evoshield...I googled chest protection for baseball and found your website. I have to say, I was reluctant to pay \$90 for this shirt when I can find others that are less expensive. However, I watched the video and was impressed. I bought the shirt for my son, a pitcher, second baseman and short stop. I always worry about him when he is on the mound. He refuses to wear anything I have purchased to protect his chest. Until I found this! No restriction, no straps, no big bulky look under your uniform....no looking like a "geek" as my son would put it. I actually have to go up and tap his chest to make sure he is wearing it. HE ACTUALLY WEARS IT WITHOUT GIVING ME A PROBLEM!! He says "of course I'm wearing it mom, it's so cool." It is a custom fit, and doesn't restrict him in any way. He even wears it for practice. Unlike the other shirts, this is not just foam protection, it is hard plastic. I tell every one I can about this shirt. When kids are in middle school and high school they want to look cool...even if that means compromising safety. Of all the things I have bought for sports over the years, this is by far THE BEST THING I HAVE EVER PURCHASED!!!! Thank you so much to the designer and inventor of this product. I can't recommend this chest protector enough. It's a cool shirt with a cool design with the added bonus of protection and comfort. B. Reid.

**March 10, 2008**

I wanted to make sure that I shared this success story with you on your chest protector. I had purchased one of the chest protectors for son last December. I had raved about it to everyone that I possibly could. One of the things that I noticed about my nine year old son, who is playing at the major baseball level here in Texas was that in the games or practices he would not step out like a lot of the younger kids tend to do at that age. The reason was that he felt so confident with the chest protector that his mechanics started improving along with his batting average. In other words he would not budge from the pitched baseball unless it was thrown at his head and then he would turn his back or just hit the deck. I also convinced my son's best friends parents to purchase the chest protector. We noticed an obvious difference in his confidence. Sure enough the first tournament that we played this spring the young man was hit and did not even flinch. Everyone that heard the thud just knew that it was going to be bad, but it wasn't. He looked like he was superman and just ran to first base. I turned to my wife and said he just got moneys worth. Let me know what I can do to help you guys sell these products. Thanks for providing a product that is going to help keep our kids safe. M Basham, TX

**March 2008**

My son was born with Hypoplastic heart syndrome. He has a desire to play baseball since he was little. I worried about it, but the doctors okd it. He has always worn a chest protector. I found your product and bought it right away. It looked far Superior to the others. He has worn it now for 6 weeks and loves it (so do i Peace of mind). The ball has hit it twice since he has been wearing it. On of the times pretty hard. His comment was I didn't even feel it. I was very happy to hear that. Thanks for all the help.

p.s Tyler plays travel baseball for the Illiana Extreme Titans 13u . It is a full time travel team. He will play in his 4th world series this summer.

Rob B.

**January 28, 2008**

I wanted to let you know how pleased I am with your evoShield chest protection. My son Paul plays goalie for his high school lacrosse team, as well as for his winter and summer league teams. Playing a position where balls are coming at you at 80-100 miles per hour, I am thankful for all the added protection that my son receives from your product. Paul has been wearing your chest protection for over a year now and the fit is so comfortable that he never plays a game without it. Thanks again evoShield for this great innovation in protection.

W Gordon, Binghamton, NY

**May 15, 2007**

Thanks to all of you for completing my multi-unit order for our league on the chest/rib armour. Thanks again for such a wonderful and much needed product.

All the best... Joyce G, NJ

**May 14, 2007**

I am writing you to tell you how much my son LOVES your chest armour shirt. His coach wishes everyone would wear it. My son Vincent doesn't even feel that he is wearing it and feels comfortable. My son would not go onto the baseball field without this shirt .

Thank you! Noreen M.

**April 27, 2007**

Reviewer: Veronica R

I received the chest armour shirt today, I want to thank you for expediting it so quickly, I think you

have a great product and your company is a pleasure to do business with. I can be more relaxed now when my son is on the mound and enjoy watching him.

**April 9, 2007**

Reviewer: Rob Martorano

Just wanted to thank you for your help in ordering the armour shirt for baseball. My son loves it. He thinks it looks cool and no one even knows he's wearing it. I bought three other types of heart guards for him in the past and he would not wear any of them. He complained that they either moved when he was in his pitching motion or were too bulky. I feel more comfortable watching him pitch or even up at bat with the armour shirt on. He loves the fact that with the rib protectors he can hang in the box without fear on the inside pitches. The custom form fitting design makes it really comfortable. I have recommended the shirt to a number of friends and wanted to let you know how happy we are with your product.

**March 29, 2007**

It is exactly what I needed... Thank you... Last weekend was the 1st time I got to wear it, and it was by far the most comfortable chest pad that I have ever purchased... I have since promoted it to everyone I know... good luck with the business... thanks again!

**March 28, 2007**

Mrs. Bryant

Trey had his first game Saturday night.

On a lighter note, when one of his teammates that had never seen or played with Trey before, He told Trey that he was really big and buff through the chest. Trey started laughing and said, "I wish I was buff but it is my chest protector." The team had a laugh over it. Trey is also the team's starting pitcher and will also be playing second base this summer.

Thank you for all you do. We will be looking forward to bigger chest protectors and etc. as he grows!

**February 18, 2007**

I recently purchased a chest/rib armour shirt for my 13-year-old son. He has been wearing a McDavid sternum shirt for the past two years, but I'm always looking for newer and better things to protect my kids. I came across All Sports Armour on Google and was immediately impressed with the chest/rib armour shirt.

My son wore it in a baseball tournament over President's Day weekend. He said he could feel the pads but it was comfortable and the shirt itself stayed drier than the McDavid shirt he has been wearing. Just today I ordered one of these shirts for my 11-year-old son.

This is a great product and something I've been looking for and wishing was out there. Both our kids pitch and catch so it gives my husband and me peace of mind that they are as protected as possible. Thank you! Linda K. Salt Lake City, Utah

**February 10, 2007**

Reviewer: Margie Porter, from DeBeque, CO

You have a product that is needed in the sport competitions, especially high school. There are so many injuries due to the aggressive playing these kids are doing now a days and whether from lack of conditioning or the aggression and probably a combination of both, there are a lot of kids in need of this equipment. I researched many products, but there just isn't much out there for protection, especially for a girl (a little vanity in there you know). This vest fits snug and is not visible, a plus. The price is doable, too. And it's absolutely amazing how it molds with the air. Good luck with this product. If there is a way to get brochures to the school coaches may be one way of getting your product out there. Michelle's coach was very impressed and knows how badly she needed it.

**January 12, 2007**

Reviewer: Shannon H from Lawrenceville, GA United States

This Product is awesome! We couldn't believe how light and strong the vest is, I feel Jeremy's safer out on the infield now.

Thank YOU!

**January 2, 2007**

Reviewer: Laurie Davidson from Athens, GA United States

Re; Use in softball. I am a former college pitcher and have done extensive work with this product. I currently teach pitching instruction and have been in business for four years upon my final year of eligibility at UGA. I have personally thrown several training sessions and have also had my own students throw in the product. You will not be able to feel the product is even there. I am sure your daughter has used some forms of dry fit, under armour material during competition. She will have the same benefits with our product, but will also have confidence with the added protection. I am passionate about this product and believe in the near future it will be next protective product mandated in the competitive arena.

Former Pitcher Univ. of Georgia

**December 22, 2006**

Reviewer: Jeremy H from Lawrenceville, GA United States

Wow!, I can hardly tell I'm wearing it. I can take one for the team and not have all the pain. It's great to have that extra confidence at the plate. Pitch me in, I'm going to drive it. Pacemaker coverage

**Nov 1, 2007**

I got the package yesterday! I took out the shirt and tried it on Taylor and it fits perfect! I will be taking this to his cardiologists so that they can tell their young patients that they can order one. When I called them for advice on ordering a protector, they had no clue. You are helping me protect my son's pacemaker!! Please get the message out that everyone could benefit from this technology. Have a blessed day.

## **Soccer shin Guard    September 5, 2006**

Reviewer: Cedric from Atlanta, GA United States

I love soccer and I have been playing for over 15 years so I have had a little experience and when these shin guards came out I was blown away. The ASA is a great investment if you plan on pursuing a bit more active soccer career. ...

My name is Trey Bryant and I am like every 13 year old boy.

I love all sports , playing games on the Playstation, listening to my CD's and hanging out with my friends. Baseball is my favorite sport. When I am not on the pitchers mound, I am either playing shortstop or second base with one exception. I have to wear my chest protector or I cannot go out on the field. It is part of my equipment just like my bat, glove, and helmet. The chest protector fits my body because it molds to my size and shape. I can still pitch and make the plays to get the outs. It is comfortable and does not affect the way I play. No one knows I have it on unless I tell them. I wear it under my shirt during games and at practice.

Thanks!, All Sports Armour, for making the chest protector so kids like me and anybody else can play their favorite sports.

Sincerely,  
TREY BRYANT

## **Recoil Shirt**

September 14, 2009

EvoShield, First of all I am 73 yrs old ( seasoned to perfection ), I need a complete shoulder replacement caused by my adventures youth. I REFUSED the advice given to me by a doctor because it would take about a year to heal plus therapy and the shoulder wouldn't take the recoil of my sporting pieces. I have your recoil shirt and have on each occasion shot about 30 rds from 30-06's, 270's and my Dakota 10 in a 7mm Dakota mag. I must have shot 500 rds this year alone. This shooting has been going on spring, summer, and now fall that is coming up. I have recoil pads priced from \$ 36.00 to \$70.00 dollars and would you believe my last one I bought was your EVOShield shirt. Right now I want to purchase another shirt in the color tan, I will be calling your company tomorrow for the extra shirt. I didn't wear out the first one but I need a clean one to use the following day. I only wish this shirt's were around when I was much younger, The recoil shirt is heaven sent, three of my sons now have the shirt. Please keep making them - my grand son will be needing one soon and my great,great grand son will also need one some day. JIM U.

August 10, 2009

Well, I finally had the opportunity to get out and test the shirt with my WB. It was excellent. Seriously, I was very impressed with how well it performed. I put 20 rounds through my .338-378, and I could have kept shooting all day. OL's shooting editor, John S, was very intrigued by my feedback about the shirt. In fact, he is interested in giving it a review/write-up in his shooting section after watching me use it. Thanks, Matt K

June 26, 2009

I believe that the following real-life testimonial will be of interest to you and your potential customers.

I have been an active hunter and sporting clays enthusiast for more than forty years. However, after I sustained massive injuries to my right shoulder in an accident and underwent extensive reconstructive surgery, my surgeon told me to not expect to resume shooting. I was extremely disappointed by this news.

While recuperating from surgery, I realized that I was not willing to give up the sport that easily, so I purchased an EvoShield shooting shirt and pad. When it arrived, I followed the instructions and formed the pad so I could show it to my surgeon at my next check-up. In fact, I wore my EvoShield to the surgeon's office!!

The surgeon and his team of medical professionals were intrigued with the option that the EvoShield offered and were supportive of my desire to find a way to continue to participate in the sport. I was so happy when they and gave me the "go ahead" to try it, although they jokingly cautioned that, "The worst that can happen is that you may lose the use of your right arm."

The following Saturday I went to the range to try the EvoShield. I shot my 20 gauge Weatherby Athena, then my 12 gauge – and I was amazed that I did not feel any pain or discomfort. The EvoShield performed EXACTLY as you claim.

Not only have I been able to resume shooting sporting clays, I have been able to hunt dove, pheasant and quail. Last week I went on a Russian Boar hunting adventure with my new rifle chambered in 270 WSM, and although this caliber of rifle generates massive energy, the EvoShield protected me so well that I FELT NOTHING.

Thank you for marketing such a remarkable product. It is a great value at any price and prudent insurance for the outdoor sportsman. Sincerely, Hon James C. *James*

March 22, 2009

Mr. Payne, I was introduced to one of your products at this years SHOT show. At first I was rather skeptical, but I purchased one of your recoil systems anyway. The reason for the purchase is one of my favorite shotguns I nicknamed "The Kraken". It is a real light Charles Daly 3 ½" magnum 12 gage pump that I use to turkey hunt with. It is ported and has a limbsaver recoil pad, all the good that does. In the past, patterning turkey loads was a sadistic ordeal. This is a technique that really should be used on Al-Queda suspects, 3-rounds and I'll tell you anything! Just don't make me shoot it again!

Last weekend we were getting ready for the upcoming season again. I sat down and hunched forward wearing my new recoil system under my shirt for the first time after fitting it. Gritting my teeth I slowly squeezed the trigger. **BOOOM!** It took a second for my vision to clear, but I was not in pain! I patterned around 15 rounds

that day and can say by the end of the afternoon my shoulder was not even a little tender! Freakin great product!

I would like to find out what it takes to become a dealer. I am strictly a one man gun shop and realize that does not always coincide with a major manufacturers business plan. Thank you for you consideration.

Leon Rookey, GUNSMITH, Dade City, FL

March 20 , 2009

The first of April came and went and I forgot to call you. Had I had any pain in my shoulder after shooting 40 rounds of 270 wsm I probably would have remembered to call a lot sooner. But I have zero discomfort thanks to the EvoShield.

*I am asking* because so many of the people that see me wear my EvoShield have not seen or heard about your product but are fascinated by it and "wished"

they could have one. I of course always show the package, provide the website and telephone number and give the 5 minute commercial about how my \$40,000 rebuilt shoulder is protected by the EvoShield. I remain curious as to how more shooters could be reached. If you have a small brochure, I would be happy to keep some with me to hand out. Maybe others would as well.

Regards, James

October 14, 2008

Dave, I can't say enough about the Evoshield recoil system. I went to Mexico in August for a whitewing dove shoot, and it completely saved my shoulder. As the beginning of the trip, all my buddies were giving me a hard time about using this new technology, as if it were a bad thing. After all, what was wrong with a regular recoil pad?

Fast forward to the evening after a two hour hunt where we all shot 400+ rounds of 12 gauge in light summer shirts. We're sitting around the swim-up bar, and I start to notice how everyone's shoulders are either bright red, or black and blue.

Meanwhile, my shoulder is still bright white (I don't get out much in the sun...). I had absolutely no bruising, no soreness....and I not so subtly let each of my buddies know how well that 'new technology' worked. My guess is you'll receive seven orders in the next few months....

One final note - I've shot several rounds of sporting clays with the Evoshield, and my scores have improved. I feel strongly that my mount has become a great deal more consistent as a result of your system.

Thanks a ton, and continued success to you.

October 13, 2008

Re; the Recoil system...EVERYONE raved about them at our shoot. I will definitely be ordering another batch for our next event! We have a few extras, but I will just keep them in case a client or two needs them here and there.

We had a mix of new and old shooters. The new shooters did GREAT, largely in part because they weren't afraid of the recoil. One guy mentioned that he didn't do so well the first time because he flinched a lot. The pad helped him perform a lot better and with greater confidence. The veteran shooters, including myself, improved our scores as well. I couldn't imagine anyone using them and not liking them.

Thanks, Linh T., John Hancock Ins.

September 4, 2008

Just wanted to let you know I was about my experience with your recoil system. This shirt is a must for any one that shoots birds on the high volume hunts. My son shot 30 boxes in 3 hours on one hunt with no shoulder pain or chafing from the recoil. He thought I was crazy for getting him the shirt until after the first day. That's when he thanked me for it.

Thanks again, Bud W.

July 16, 2008

First, let me tell you about my hunting trip in Argentina. It was the best ever. I hunted duck, partridge and dove.

On the first morning of duck hunting, I got my limit of 30 in less than 2 hours. The dove hunting was really amazing. My first day I got about 1200 birds. The best part was in the afternoon. I shot about 770 birds in a little over 3 hours.

The shirts you sent me were fantastic!!!!!! No sore shoulder at all. The best part though was that the pad helped me shoot birds when I was really tired. I found that if I could just lift my shotgun up into the preformed groove, I would normally make my shot. The groove really helped me get my gun in position. Without it, it would have been much more difficult to make my shots.

I look forward to hearing from you and hunting more in Argentina. Terry

July 1, 2008

Your recoil protection shirt (EvoShield) is the most amazing invention I have ever owned. I just returned from Dove Hunting In Argentina and did not have one bruise mark on my shooting arm. Last year my arm actually blistered and bruised and really I was very uncomfortable after the first day. (We average about 2000 rounds a day each) I am a believer and have recommended the EvoShield to many friends. Thanks for making my trip even more enjoyable. I will pack it first before I return next year. Thanks Rep. Jay Shaw -- Lakeland, GA

After years of sports related "abuse" my right shoulder has severe arthritis, to the point where total replacement was the alternative for pain and range of motion relief. My love for hunting led me to seeking surgical evaluation and proceeding in the direction of reconstruction. At the LAST evaluation with surgeon I inquired as to the effect ft/pounds of kinetic energy (recoil) would have on the appliance? After I explained my "recoil" question he was hesitant to say impact would have post surgery, his reluctance has led me to postpone surgery. At the recent NRA convention I purchased your evoshield shooters shirt, last week I followed the simple instructions and spent 2 hours at the range with my .375 ultramag, I'm happy to report amazing lessening of recoil and little pain from the heavy caliber. At some point surgery is in the cards but for now its Cape Buffalo in Africa 2010. I've ordered one more for myself and 2 for freinds and will probably be ordering more as I pass my story....thanks again, Kal L.

April 6, 2008

I purchased my first evoShield shirt with pad in February 2008 and wore it while sighting in my rifles in the following calibers: 7mm Magnum (160 gr.bullet), 30.06 (180 and 220 gr.bullets) and 300 Weatherby Magnum (180 gr.bullet). Over 3 different dates (I shot all three calibers each day), I used a total of about 15 rounds per caliber.

The evoShield shirt was super! I wore it as directed with a tight fit, and the system took the recoil out of those bangers, especially the heavier recoil 300 Weatherby mag..

I later used the shirt in Argentina shooting red stagg, ram and goat, and I couldn't tell I was wearing it, except for one day when the temperature hit the high 70's and I was a little warm due to the snug fit. Great product and I will buy more.

Mar 2,2008

David, thank you for going the extra mile and getting your recoil system to me before I left to go to Argentina on my annual dove hunt.

I have been shooting in Argentina for about 10 years now and have always looked for a recoil pad that would stay put but, not be bulky since you mount your gun so many, many times down there. Six of us made the trek this past February, 2008 and three wore your product and three wore other products. The three that wore the other products ended up having the normal bruises and scrapes because the recoil pad was either too small or they were not getting the gun where it belonged on the mount. The other three of us only had bruises where we had miss-mounted our guns, mostly on our bicep, but absolutely none on our shoulders. The three of us that used your system ranged from beginners to folks who had shot all of their lives. Due to the pad being fitted for you and then it hardening, it must soak up and divert the recoil of the gun across the whole recoil pad. Also, because of the fitting process, it is much easier to get the gun mounted to where it belongs. I am going to fit some kids that I shoot with, with your pad to see if it will help them mount their guns more consistently, thereby allowing them to shoot better and have more fun.

By the way, I now have the record amount of dove shot in a single day. I shot 10,012 birds with 13,000 rounds in around 14 hours of shooting! The folks at Sierra Bravo in Cordoba, Argentina put me in the "HONEY HOLES of HONEY HOLES". I have never seen as many birds flying in such a small area for that amount of time! Again, I did not have a bruise and probably kept shooting well because of that. I cannot recommend your product any stronger than to say I have purchased several more and will continue buying them and recommending them to all of my hunting buds.

Thanks again for making sure I received your product before the hunt! You have a superb product and showed your great customer ethic!

Stan, Jim is the Chief Shooting Instructor at Triple B here in the Los Angeles area. (He is also my instructor) Jim helped me "fit" the EvoShield this morning. After about 20 minutes, we went shooting and your product is remarkable. Virtually no felt recoil; just a gentle "push". Jim has been teaching for many years and this was the first time he had the opportunity to see your product in action. He asked for the package with your contact information and I gladly gave it to him. I expect you will here from Jim in the morning.

Jan 24,2008

I used the shirt last week quail hunting in South Georgia and it works very well. It is amazingly effective---and you'll sell many to people who shoot alot. Thanks again.

I bought 6 of these . My sons and I took them to Argentina for a high volume dove/duck shoot. After firing about 8,000 rounds in a week, I had one little red mark on my shoulder. It works.

June 12, 2007

I am writing to tell you how happy I am I found your product. I purchased your recoil shirt and shield a few months ago. I do a decent amount of trap shooting (for someone living in a city) with a 12 gauge that only has a hard plastic butt, no recoil pad. I've had my share of bruises. I was never really satisfied with what's generally available as far as shirts, vests and jackets or recoil pads and such. For the last few years I've been looking for something more comfortable and not as loose as a vest or jacket. I even considered trying to make something myself. The best idea I could come up with was to use something "spandex-like". So I went in search for "spandex-like" shirts and bingo there you guys were. Now that I've used your product several times with several different guns I can say that its the best shooting accessory I've ever purchased. Because the pad molds to your body and to the stock of the gun I shoulder my gun more consistently and shoot with more consistency. I found exactly what I was looking for. A shirt that wasn't too loose or baggy but comfortable, and although it fits tightly its not at all uncomfortable. As an added bonus I shoot a little better. And as far as the performance of the shield itself.....Incredible!!! I feel almost nothing while I'm shooting, I have no soreness or bruising or anything ever. This is now an essential item to have when going shooting. I will never be without one. Ultimately I can not put into words how happy I am with this product.
